NEW PROJECT SUSTAINS FUTURE DEVELOPMENT

12-INCH WATER MAIN FROM CR 395 TO SAN JUAN AVE.

You may have recently noticed Regional Utilities construction crews in the area of CR 395 south of Publix. This project was part of our Master Plan, which included the design, permitting and construction associated with installing a 12 inch water main from CR 395 east to San Juan Avenue. Regional Utilities worked with the Florida Department of Agriculture and the Consumer Services Forestry Division to obtain an easement for the installed infrastructure. This project will allow the water distribution system to maintain water pressures to sustain future development in our eastern service area.

NEW FEATURES REGARDING YOUR ONLINE ACCESS

As a Regional Utilities customer, you will soon be able to access any and all accounts associated with a single email address. Other new features include updating or changing contact information (mailing address, phone number, etc.) and the ability to view payment history and print individual bills within the last 10 years.

Payment by MasterCard, Visa or Discover are accepted online.

WATER METERING EQUIPMENT CHANGE OUT

CREWS MAY BE IN YOUR AREA TO CHANGE OUT THE WATER METERING EQUIPMENT

We will be changing out approximately 11,000 meters in our service area. To date, 3,000 have been installed. A short interruption of service (approximately 30 minutes) will be required to complete the work. The meter box and the immediate area around the meter box may be dug up in order to perform the necessary work. This means any obstructions (i.e. bushes, flowers, trees, etc.) will have to be trimmed, moved or otherwise altered in order to acquire the necessary access to perform the work. **We apologize for any inconvenience this may cause.**

EMPLOYEE APPRECIATION

On June 15th, we celebrated an Employee Appreciation Day. Employees that have been with us for 10 years and above were recognized. Regional Utilities appreciates all of the hard work and dedication from our staff.
